HOOP

Harwinton Opioid Outreach Program

Ask Your Doctor

When being prescribed a new medication

- Is there a potential for abuse this medication? Could this medication be addictive?
- What are the possible side effects of this medication?
- What interactions might this medication have with other medications or supplements that I am taking, or with alcohol and other substances?
- When do I stop taking this medication?
- Is this the lowest dose available?
- What will happen if I take too much?
- Is there an alternative medication, or over the counter medication that I could take instead?
- Are there any long term effects of this medication? How will it feel when I stop this medication?

IN CASE OF EMERGENCY, CALL
